Technical Experience

EVENT-MANAGEMENT MOBILE APPLICATION

TEAM MEMBER - BCIT INDUSTRY PROJECT   APRIL - MAY 2023

The React Native-based Event Management mobile application, drawing inspiration from the PGA Tour, enables individual attendees to register for events they are eligible to participate in. The app empowers hosts to effortlessly create and manage a wide range of events, including tournaments, exhibitions, and clinics. Users can conveniently browse through the available events and register for those that align with their eligibility criteria.

- Integrated AWS Amplify into the project for seamless integration of cloud services, enhancing functionality and security.

- Set up global context and request interceptors for efficient data management and handling of API requests in the application.

FOODSCAPE

TEAM MEMBER – BCIT INTERNAL PROJECT   JAN - APRIL 2023

Developed and designed an intuitive festival information and ticket purchasing website using ASP.NET MVC and MS SQL Server, providing a streamlined user experience for event-goers to access event details and securely complete transactions using Paypal.

- Managed the GitHub repository to facilitate efficient collaboration among team members, preventing merging conflicts and streamlining the development process.

- Designed and implemented a user review feature, allowing registered users to leave personalized reviews and ratings, enhancing user engagement and feedback.

Work Experience

SEASONS CATERING

SOUS CHEF   FEB 2020 - MAR 2020

Engaged in training for a new Sous Chef position until COVID-19 lockdown.

MEADOW GARDENS GOLF CLUB

SOUS CHEF   SEPT 2017 - FEB 2020

Supervised multiple kitchens with distinct menus, ensuring timely task completion and upholding exceptional quality standards. Played an integral role in menu creation, training development, and mentoring new staff to ensure consistent performance and adherence to company standards.
